*Introduction (Emberger) **

G. Emberger welcomes all participants to the 4th Advisory Board Meeting VKM AT-HU.

*Progress report HU (Koren) **

C. Koren shows the tasks carried out by the HU project team since the last Advisory Board Meeting, including the adaption of the transport systems and link types, zoning, and collecting data for the demand model. First assignment runs were done.

*Progress Report (Schumich) **

M. Schumich presents the AT tasks, analyzing the HU network, changing the whole model language from German to English, coordinating a planned transport survey with the EMAH project, and collecting possible scenarios to test the model.

*Scenarios (Miletics) **

D. Miletics shows a list of possible scenarios based on the INAT project (Infrastructure Needs Assessment Tool). G. Emberger questions this project, as the

proposed infrastructure measures are not derived from goals but mainly based on political wish lists.

*National travel to work survey (Koren) **

In the absence of K. Tóth-Temesi C. Koren presents the results from the national travel-to-work survey carried out by the KTI. The survey is finished, but no scientific results have been published yet.

*Outlook (Leth) **

U. Leth informs that the AT-HU project has been extended for 6 months and will now end in March 2014. Next steps will be (mainly on HU side) completing the zoning system, public transport stops and lines, input socio-demographic, behavioral and structural data, calculate attraction and production rates and introduce count locations for calibration.
